exercising our person-perception skills on other people, those same people are also using their powers of person perception to form impressions of us.

6.5 Chapter Summary - Principles of Social Psychology

Perception refers to the way sensory information is organized, interpreted, and consciously

Get Free Chapter 6 Perception Psychology

experienced.

Perception involves both bottom-up and top-down processing. Bottom-up processing refers to the fact that perceptions are built from sensory input. On the other hand, how we interpret those sensations is influenced by our available knowledge, our experiences, and our thoughts.

What is Perception?
