Curves for Computer Aided Geometric Design. Jens Gravesen Department of Mathematics Technical University of Denmark March 3, 1999. 1 Introduction. The acronym CAGD stands for Computer Aided Geometric Design and the field is concerned with specifying and analyzing classes of curves (and surfaces) which can be used to model free form shapes, e.g. in CAD-systems.

Curves for Computer Aided Geometric Design

curves and surfaces, have been widely researched in [13-19]. Nowadays, the research on geometric continuity conditions of curves and surfaces with shape parameters is still a hot issue in the CAGD field. Hu et al. [20] presented a novel shape-adjustable generalized Bézier curves and surfaces (that is SG-Bézier curves and surfaces) firstly.
