Science Was Born Of Christianity

It is a stark claim to say that science was born of Christianity, but do not reject this claim without understanding what it is about, as so many have done. This book provides the historical research and the reasoning in outline form, to be read beginning to end, browsed one chapter at a time, or referenced when presenting and defending the argument to others.

But science did not fully develop there as it did in Europe. In her metaphor, science was stillborn in these cultures. The book argues that only in Christian nations were the circumstances right for science to progress to the point it has today. Why? Because our Christian culture sets out a single creator of a rational universe.

Link: WOF 240: Science was Born of Christianity. While Catholic teaching maintains that God operates within the universe, it does not go all the way to saying that God is the universe. Rather, we say that God created the universe and holds everything in existence. The universe is not God, it is God's creation — God's handiwork.

I will use this framework to state in my own words the thesis of Science was Born of Christianity: The scientific enterprise was hampered for centuries by deeply rooted cultural worldviews that in various ways were contrary to the structure of the cosmos. These worldviews, while perfectly satisfactory from an everyday point of view, introduced subtle unknown unknowns, disjunctions that made it all but certain that science would remain fruitless until Christianity reached its fullest ...

WOF 240: Science was Born of Christianity. The narrative that science and Christianity are enemies is false. Not only are they not enemies but Christianity helped science develop beyond the limits imposed on it by ancient cosmologies. In this sample lesson from her Word on Fire Institute course titled "Science for Evangelists," Dr. Trasancos introduces us to the basics of science and why there is no real conflict between science and Christianity.

It is in this larger "jakian" stream that Stacy Trasancos inserted her own contribution, Science Was Born of Christianity. In chapters 1, 2, and 3, Trasancos parses elements of the book's title—"Science," "Was Born," "Of Christianity," respectively-to illuminate Fr. Jaki's main insights about the interface between real science and true religion. In the first place, what do we mean by "Science"?
